A. M. JEAFFRESON,

Receiver, &c.

We, whose names are hereunto subscribed, have Examined and Audited the preceding Account for the Year One Thousand Eight Hundred and Seventy-seven, and find the same correct and the Balance as specified, this Twenty-second day of January, One Thousand Eight Hundred and Seventy-eight.

JNO. BAGGALLAY, Treasurer, GEO. WARE, WALTER D. CRONIN, W. S. GOVER.

KING EDWARD'S SCHOOLS.

CHAPLAIN'S REPORT, 1877.

To the Right Worshipful the PRESIDENT, the Worshipful the TREASURER, and the GOVERNORS of King Edward's Schools.

My Lords and Gentlemen,

I have the honour to present to you my Annual Report on the state and condition of your Schools for the year 1877.

During last year there were—

	An	MITT	ED.				Dis	CHAR	GED.	•	
Boys		0 0	• •	• •	72	Boys			• •		68
Girls	• •	• •	• •	• •	50	Girls	• •	• •	• •	• •	48
Tot	al	• •			122	T	otal	• •			116

There were remaining in the School, on the 31st December last, 158 boys and 159 girls, making a total of 317. The children admitted were of the usual class, poor and fatherless,

and such as, to use the language of the scheme for the regulation of the charity, "if not so admitted would be under temptation to commit crime." No convicted children have this year been received; but three unprotected applicants have been taken in on the recommendation of Aldermen of the City of London. I note that some few have come from a great distance: one, e.g., from Cumberland, and two from Somersetshire; but the vast majority are from the poorer parts of the metropolis and its suburbs. In accordance with the rules of the School, "all the inmates are exercised in industrial occupations so as to fit them in gaining an honest living." They receive on an average $15\frac{1}{2}$ hours instruction in the School-room, and 24 hours industrial training, per week.

The inmates discharged during the last year have been disposed of as follows:—

BOYS.

To the Army, Regimental Bands, and Tailors' Shops		
To the Royal Navy—Training Ship		
To Situations (various) provided by the Governors		17
To Situations provided by Friends		14
Removed by Friends without Situations		16
Returned to Friends unfit for School	• •	1
		68
GIRLS.		
To Situations as Domestic Servants		45
Removed by Friends without Situations	• •	3
		48

The number of applications for girls for private families is greatly in excess of the Matron's means of supply; and it is most satisfactory to record that in nearly every instance these applications are the result of the observed efficiency of the King Edward's School girls:—one lady recommending the School to others having vacancies in their households. of the Governors who have gone over the Establishment (which is at all times open to their inspection) and who have observed the modest and cleanly appearance of the inmates, and the careful manner in which they are trained in all the various branches of domestic work, will feel no surprise at this result. Further, in all the little trials and difficulties which they have to encounter at the first start in life, the girls are encouraged to apply to the Matron for advice and direction; and correspondence with them, and visits to them in their places whenever a personal interview seems desirable, occupies a very considerable portion of the Matron's timetime which, however, is well employed; for I attribute to this constant supervision—this kindly interest in their welfare even after they have ceased to be scholars—no small portion of that success which this branch of your Institution. has undoubtedly obtained.

It is still a subject of regret to me that so many parents withhold their consent to their boys entering the Army and the Navy. This is the more mortifying because my means of placing them in the services are almost unlimited, the Commanding Officers preferring our boys to others on account of the habits of discipline they have acquired. It is not unusual for me to find on board the Training Ship one or more boys who have been withdrawn from the School to go

to some inferior occupation in London, and who have ultimately joined the Navy after temporary employment, thus forfeiting their outfit and subsequent rewards. It is, however, only right to add, that some who have been removed by their friends have been able to compete successfully for situations in the service of the General Post Office; and in these cases the Committee usually give a suitable outfit.

There is no better test of an Institution than this—that it engages the affections and sympathy of the pupils so that they delight in visiting their former home. I therefore observe with pleasure, that it is becoming increasingly the custom for boys who have left us either for the Army, the Navy, or other occupations, to spend a portion of their holidays in the neighbourhood of their old School. villagers whose acquaintance they have made during their school-days, are always willing to give them temporary accommodation for a small remuneration, and it is very pleasant to me to see them again in the Chapel among the general congregation. The Chapel does indeed represent the great fundamental principal on which the whole Institution is based, viz:—a sound religious education. And when I observe these lads attending our services, no longer under compulsion as a matter of School discipline, but freely and voluntarily, I cannot but hope that our simple, but I hope, hearty Ritual has engaged their affections.

Owing to the prevalence of a slight epidemic in the Girls' School during the summer, it was thought undesirable to have anything like a public examination of the pupils in London. At the request of the Treasurer, and in his presence, the girls were examined by the Assistant Chaplain and

myself, and in all the subjects they acquitted themselves most creditably, and I feel sure that our kind friend the Rev. J. Wallace, who has conducted the examination in several former years, would have been justified in making as favourable a Report as usual, had he been able to attend.

The Boys' School was examined by the Government Inspector on the 26th of June, and I transcribe his Report, which I trust you will think, on the whole, satisfactory.

"June 26th, 1877.

- "To the Governors of King Edward's Schools, Witley.
- "It has given me great satisfaction to be again called upon to examine the Boys' School, at Witley.
- "The work is generally good throughout the School, and shews the careful and intelligent teaching which has been given by the Staff.
- "Arithmetic, geography, and writing are highly creditable, whilst the answers in Scripture and Church Catechism prove that the fundamental portion of their education has been the source of constant and anxious attention.
- "The reading and spelling are the points in which the lower classes fail most, and, in my opinion, this may be best contended with by the Head Teacher taking these subjects as often as possible in preference to leaving them to the Pupil Teachers.
- "The recitation of the first class was very correctly given, though there is room for improvement in delivery, intonation, and emphasis.
- "Their reproduction of a story read to them as a test of memory, and of composition was generally good, and in some cases really excellent.

"The singing is capital; the drill steady and good.

"I am very pleased to find that a brass band has been commenced, and has already attained considerable efficiency; it will prove a great acquisition for purposes of drill, for the general happiness of the School, and for affording an eminently good opening for boys who leave it for regimental or naval bands.

"WYNDHAM HOLGATE,

"Her Majesty's Inspector of Schools."

I think it right to say with reference to the paragraph recording the Inspector's opinion of the reading and spelling of the lower classes, that he appears to have been under a rather erroneous impression. There is no class in the School which does not in its turn receive the Head Teacher's personal superintendence and attention. We are glad, however, to have the benefit of the Inspector's criticism, and the subject has already engaged our efforts after improvement. It is one of the chief advantages of the annual inspection that it detects some weak points which might otherwise have escaped observation, and I should look with some suspicion on a Report which did not notice imperfections as well as excellencies. The Brass Band, to which the Inspector alludes, has been worked up to a state of real efficiency by our new and zealous Band Master, and on a recent occasion when we gave our Annual Concert—a very successful one, I think I may say, conducted by our School and Choir Master with his usual ability—the instrumental part of the performance was greatly admired by the large number of visitors present.

The Lord Bishop of ROCHESTER, in whose Diocese our:

Girls' School now is, kindly gave us a special Confirmation in the month of November, when 55 Candidates were confirmed, and together with a large number of former inmates, who had been confirmed in the Chapel in previous years, received the Holy Communion at his Lordship's hands.

One hundred and sixty-four rewards — an increase of twenty-six over last year—were given by the Committee to former inmates, who had maintained good characters in their situations. Twenty-five boys and thirty-four girls were rewarded for the first time; thirty-five boys and twenty-one girls were rewarded for the second; and thirty-six boys and thirteen girls for the third and last time.

The new buildings at Witley, of which I spoke in my last Report, are now completed, and will probably be partially occupied by an additional number of boys in the course of the present year—the number of girls will also be increased in the same proportion.

The health of the boys has been remarkably good this year, and although there has been scarlet fever in the neighbouring village, it has not reached our School, an evidence, I think, that our sanitary arrangements are in a satisfactory state.

I have nothing to complain of in the conduct of the inmates, and I continue to receive very zealous and efficient support from all the officers and servants of both Establishments.

I cannot close this, my twenty-second Annual Report, without thanking the Governors for the unabated confidence with which they honour me.

I am,
My Lords and Gentlemen,

Your faithful Servant,

EDWARD RUDGE, LL.B.,

Chaplain and Superintendent.

WITLEY, January 17th, 1878.

LONDON.

DAILY ROUTINE.

Hours of Rising.

Six o'clock in the summer months, and not later than 7 o'clock in the winter months.

After private prayer in each dormitory, washing, dressing, &c.

On Week Days.

The girls selected for employment in the Laundry and Kitchen, and in Household Work, to be engaged in their particular occupations, and the rest in making beds, and sweeping and cleaning the dormitories and other apartments on the female side.

From 8 to 9 o'clock.—Prayers, breakfast, and recreation.

Girls selected for particular employments to be at their respective occupations from 9 to 1 o'clock, as the Matron shall direct; and on alternate days at School during the same hours.

From 1 to 2 o'clock.—Dinner and recreation.

Girls selected for particular employments to be at their respective occupations, and the rest at needlework, from 2 till 5 o'clock, and in occupation from 5 till 6 o'clock, as the Matron shall direct.

From 6 to $7\frac{3}{4}$ o'clock.—Supper and recreation.

From $7\frac{3}{4}$ to 8 o'clock.—Prayer.

8 o'clock.—Bed-time.

On Saturdays.

No school to be kept, either in the morning or afternoon. The girls on this day to be engaged in cleaning the establishment, assorting and distributing clean linen, using the bath, and in such other occupations as the Matron shall direct. The recreation of the inmates to be, when the weather will permit, in the airing grounds, and at other times in the day-rooms, which are to be provided with suitable books for amusement and instruction.

On Sundays.

Until 8 o'clock.—The inmates to be occupied in making beds, changing linen, and delivering up all that is dirty, and preparing for the proper spending of the day.

From 8 to 10 o'clock.—Breakfast, and walking in the airing grounds, when

the weather will permit.

From 10 to 11 o'clock.—In school rooms, reading the Lessons for the day, repeating Catechism, and answering questions on scriptural subjects.

From 11 to 1 o'clock .- In Chapel for Morning Service and Sermon.

1 o'clock.—Dinner.

From $1\frac{1}{2}$ to 3 o'clock.—In the day rooms, and airing courts.

3 o'clock.—Afternoon Service in Chapel and Sermon.

7 o'clock.—Supper. 8 o'clock.—Bed-time.

BETHLEM HOSPITAL.

REPORT.

To the Right Worshipful the PRESIDENT, the Worshipful the TREASURER, and the Governors of the Royal Hospital of Bethlem.

My Lords and Gentlemen,

I beg to present you, in conformity with the regulations of my office, a Report for the year 1877, accompanied by the usual Statistical Tables.

	Males.	Females.	Total.
Number of patients at the commencement of	•		
the year	110	164	274
Received during the year	108	119	227
Whole number treated	218	283	501
Daily average under treatment	$99\frac{1}{2}$	133	$232\frac{1}{2}$
Discharged recovered	32	71	103
Discharged uncured	39	45	84
Discharged for special reasons	14	6	20
Dischargeddisqualified after admission	11	4	15
Died	18	7	25
Whole number discharged and died	114	133	247
Remaining in the Hospital	104	150	254
	218	283	501

It will be observed that 11 males and 4 females were disqualified by the Committee after admission, and the Statistical Tables are made up on the number actually admitted and treated.

The Committee meet once a week, but patients can be brought to the Hospital and received on any day when the necessary legal forms have been complied with. This privilege is a most valuable one, as though some exceptional cases may be found, a few days after reception, to be ineligible according to the Rules of the Hospital, it enables us to receive a large number of acute cases in which time is very precious, and where the delay of a week or even a few days might prove fatal.

It will be seen on reference to Table No. 19 that, with one exception, the causes of death have all been natural. The number dying from General Paralysis is very considerable when compared with the total, and is open to comment in a hospital supposed to be intended for only curable cases. As I have, however, before frequently observed in my Reports, the Committee, when considering each case, exercise the greatest possible latitude, and whenever the disease has not existed twelve months, or there is the least cause for doubt, the decision is always in favour of the patient.

This must, of course, produce a certain result in our statistics, but there can only be one opinion as to the benefit conferred on the suffering patient or the relief afforded to the friends. It is always gratifying to have satisfactory

statistics, but a charitable institution like Bethlem Hospital may be doing its work well, and affording incalculable assistance to very deserving objects, though at the time of admission the final result of the case can be but too truthfully predicted.

Another advantage, and that no small one, in a school for mental diseases, is the opportunity thus given for studying the œtiology and pathology of a disease that at the present time is occupying the earnest attention of a large number of the medical profession.

Three inquests have been held during the year in the following cases:—

- J.W.—A patient who had been for many years on the incurable establishment, who died from Paralysis. Having been admitted under an Order from the Secretary of State, an inquest was necessary, and a verdict in accordance with the facts was returned.
- W.T.—A married man, aged 35, admitted February 3rd.

 After a few days of slight depression, on January
 31st he became excited, escaped from his house,
 got over a wall six feet high, and ran to the
 police station. He was wildly maniacal on
 January 31st and three following days, raving
 constantly, and requiring three men to restrain
 him; was tied down to the bed with sheets.

On admission he was weak and rather faint, had extensive bruises on thighs and arms, as if from finger marks, and also one large bruise over right iliac region. This patient gradually became weaker and more unconscious, and died on the evening of February 6th, the third day after admission. He had passed no water during the time he was in the Hospital, the catheter only drawing off a few ounces of bloody fluid.

The post-mortem examination discovered extensive rupture of the bladder, and the jury returned a verdict that death was caused by injuries accidentally received prior to admission into the Hospital.

This case is fully reported in the Lancet, March 31st, 1877.

M.M.—During the time service was being held in the Chapel, this patient contrived to commit suicide by hanging. The facts were fully reported to the Committee, and the jury in giving their verdict desired to express their opinion that no blame could be attributed to any of the Hospital officials.

In these days of non-restraint and almost unlimited free-dom for patients, the greatest care and watchfulness cannot always avail against a determined suicidal impulse. But even an accident such as this, sad as it is, and earnestly endeavoured by proper vigilance to be avoided, should cause no regret that the straight-waistcoat, restraint-chairs, long

periods of seclusion, and similar methods of treatment, are things of the past.

Early in the year one of the female patients, during the momentary absence of the nurse, put a piece of lighted paper under her clothes, and though discovered immediately was very severely burnt, and for many weeks was the subject of most anxious double watch. She had been reported "not suicidal," and gave as an excuse for leaving the tea table that she felt very sick. Had the nurse not immediately followed her, the injuries must have been much more serious. I had the ultimate satisfaction of presenting her to the Committee completely restored both in mind and body.

The Obituary Table has been very carefully prepared by Dr. Savage, and contains much interesting matter. Postmortem examinations were made in twenty cases, and the importance of such examinations cannot be too highly rated. We have very little difficulty in obtaining the necessary permission, and though we must remember that the friends as a rule belong to the educated classes, I am inclined to believe that a little judgment and tact on the part of the Medical Officers are more likely to be successful than any hard and fixed rule made public at the time of admission of the patient.

Table No. 18, giving the occupation of patients admitted during the year, shews at a glance the social position of our inmates, and affords the best possible proof that the Hospital is relieving deserving objects, who if rejected here would

most probably have to apply to the parish authorities. of 95 males admitted, we had amongst others 21 clerks, 6 surgeons, 4 artists, 1 clergyman, and 24 small tradesmen. On the female side we admitted 22 governesses, 5 relatives of professional men, i.e. wives, widows, or daughters, and 26 wives or daughters of clerks or tradesmen. It is of course, at times, extremely difficult to draw any fixed and hard line in doubtful cases, as regards the suitability of the County Asylum, but the present condition and management of our public Asylums considerably lessens this difficulty. It has always appeared to me a matter for regret that the word "public" is not substituted for "pauper" in reference to lunatics. I can speak most confidently from my experience at Bethlem of the comfort such a change of terms would be I am also certain this would to a large and deserving class. benefit many lunatics whose friends, looking with horror, unreasonable no doubt, but still natural I think, at the prospect of a "pauper" Asylum, make any sacrifice to keep the patient at home, thus doubtless losing the great benefit of early treatment, and eventually aiding to swell the list of incurable lunatics.

It has been our aim during the year to maintain the reputation of the Hospital as a school for the study of mental diseases. Dr. Savage and myself have continued our lectures at Guy's and St. Thomas's, and a large number of the students of these Hospitals have been admitted to see the practice here.

The admission of medical students into a Lunatic Hospital is of course attended with certain difficulties, but under care-

ful supervision, the experience of the last few years has clearly demonstrated that most valuable instruction may be imparted, with a minimum of annoyance or injury to the patients.

A large number of both male and female patients were sent to the Convalescent Establishment at Witley during the summer months, and derived great benefit from the change. This institution continues a valuable addition to our other means of treatment, and I can point to many cases where the few weeks' residence in the country has proved of immense value in thoroughly restoring the patient's health before returning to home duties and anxieties.

There have been very few changes in our staff of attendants and servants. I can speak very highly of their conduct, and the manner of performing their duties. I have no difficulty on the female side, as should any change occur, I have always good candidates on my list of applicants. The following Table will, however, show that the changes are very few:—

We have more changes on the male side, and though our wages are good, I have some difficulty in obtaining the services of first class attendants. Our position in London, and the demand for labour, of course considerably affects us in this respect.

In a Report of this character it is, of course, impossible more than casually to refer to the various methods of treatment adopted. So far as it is in our power no means are left untried that can be suggested for the amelioration of the condition of those who are placed under our care, and owing to the liberality of the Committee we are enabled to make trial of any new remedies or appliances that from time to time may be brought under our notice.

I cannot express too strongly my appreciation of the assistance rendered to me at all times by my colleague, Dr, Savage, by which my labours and anxieties are much lightened. Mr. Haydon continues always ready, as he has been for so many years; to give valuable help in every way, and I cannot help attributing much of the success that has attended this Hospital to the cordial good feeling that exists between the officers and other officials.

The Commissioners of Lunacy visited the Hospital on the 15th December, and left the following Report:—

Bethlem Hospital,

December 15th, 1877.

We have this day inspected this Hospital, and find on the books the names of 251 patients, namely, 106 men and 145 women. Of the men 4, and of the women 10, were absent on leave; all the rest we have seen. Eight men were in bed, but no one on the female side, and the health generally of the patients appears to be very good, though there are in the male division many cases of general paralysis.

Since the last visit of the Commissioners on the 13th October, 1876, there have been:--

Admissions: — 132 Males.	129 Females.	Total 261.
Discharged:-112 ,,	159 ,,	,, 271.
DIED 20 ,,	11 ,,	" 31

Of the patients discharged, 40 males and 85 females are stated to have recovered.

Considering the large number of acute cases admitted, including many instances of general paralysis, the rate of mortality has not been high. The following are the assigned causes of death:—

	M.	\mathbf{F}_{\bullet}	TOTAL.
General Paralysis	9	0	9
Other forms of Brain Disease	2	0	2
Exhaustion after Mania and Melancholia	2	5	7
Pulmonary Consumption	2	2	4
Other forms of Lung Disease and Heart Disease	4	2	6
Senile Decay	0	1	1
Suicide by Hanging	0	1	1
Rupture of Bladder before Admission	1	0	1
			0.7
	20	11	31

We are glad to report that post-mortem examinations were made in all but four instances, the previous consent of relatives having been in all cases obtained.

The death from rupture of the bladder occurred three days after admission; the case formed the subject of a Coroner's Inquest, and the evidence clearly shewed that the injury was sustained previous to the patient's reception here. The par-

ticulars of the case were reported at the time to our Board. Inquests were also held in two other instances—namely in the case of suicide, and in that of an aged woman admitted originally by order of the Secretary of State and who died from senile decay.

As we passed through the wards we observed, generally, great order and tranquility, and no one was under restraint or in seclusion. According to the "Medical Journal" there has been no restraint since the last visit, and seclusion has been employed only in the cases of two males, for a total duration of 22 hours, and in those of 8 females for an aggregate of 64 hours. This is a most creditable circumstance, and could only have been arrived at by the maintenance of the very adequate and skilful staff of attendants we are glad still to find here.

We are informed that since the last visit 27 male and 61 female patients have had the advantage of residence, for longer or shorter periods, at the branch establishment at Witley. In addition to frequent visits from friends in the Hospital many patients have been allowed to go out for the day as well as for longer periods on leave, privileges which are evidently much appreciated. No reasonable complaints of any kind were made to us, but we heard many expressions of gratitude for the kindness and attention experienced here.

We thought in several instances that the dress of patients in the male division required renewal; otherwise the condition of dress in both sexes was satisfactory. As regards Divine Service and the ministrations of the Chaplain, there is nothing fresh to report.

The meetings for dancing and other amusements are continued as usual.

On the male side some of the patients expressed a wish to be allowed to stay up later in the evening, a wish which Dr. Williams hopes to be able to gratify in the case of quiet and convalescent patients.

We are glad to report that the wards, universally, were scrupulously clean and the ventilation of them excellent. There are now few exceptions to an aspect of cheerfulness and comfort, many improvements having been effected since the last visit, including the papering and painting of No. 1 ward on the male side, and of several sitting rooms in both divisions.

The walls of the bath rooms have also been plastered and painted. We trust that these improvements will be steadily continued until the whole of the interior is brought into the excellent condition of the best wards. The beds, bed linen, and furniture, generally, are clean and good.

In conclusion, we desire to record our opinion that this Institution maintains its high character for efficiency and usefulness, and continues to reflect great credit on the management of Dr. Williams.

JOHN D. CLEATON, Commissioners in Lunacy.

In conclusion I beg sincerely to thank the Committee for their continued confidence and consideration at all times. They are enabled from frequent visits to see the work that is being done, and also to appreciate the responsibility the superintendence of such an Institution involves.

I have the honour to be,

My Lords and Gentlemen,

Your very obedient Servant,

W. RHYS WILLIAMS, M.D.

January, 1878.

DIETARY TABLE.

BREAKFAST.

Every Day.. Males .. Tea, with 7 oz. of Bread and Butter.
Females.. ,, 6 ,, ,,

DINNER.

Supper.

Sunday, Monday, Tuesday, Thursday, and Friday Males ... Same as Breakfast.

Wednesday and Saturday .. Males ... 7 oz. Bread, 2 oz. Cheese, 1 pint Beer.

Every Day Females.. Same as at Breakfast.

Patients in employment in the Grounds, Workshops, or Laundry, to be allowed 4 oz. of Bread, 1 oz. of Cheese or $\frac{1}{2}$ oz. of Butter, and $\frac{1}{2}$ a pint of Beer for Luncheon, and $\frac{1}{2}$ a pint of Beer in the Afternoon.

Every Patient to be allowed $1\frac{3}{4}$ oz. of Tea, 8 oz. of Sugar, 8 oz. of Butter, and $1\frac{1}{2}$ pints of Milk weekly.

On Christmas Day the Dinner to be Roast Beef and Plum Pudding.

On New Year's Day, a Mince Pie to be added to the usual fare.

On Good Friday, a Bun.

On Easter and Whit Monday, 6 oz. of Roast Veal to be allowed instead of the usual Meat for the day.

The Steward has liberty to vary the diet occasionally by Pork and Bacon, when Peas and Beans are in season; and by Fish, Fruit Pies, &c., when Fish and Fruit are plentiful and good.

The Sick to be dieted at the discretion of the Resident Physician.

The Attendants to have at all times the means of obtaining Gruel for such Patients as may require it.

The above to be considered maximum allowances, and all quantities unconsumed are to be taken in diminution of the next supply from the Stores of the Hospital.
